Step 6 : add the second column.....	4
Step 7 : add the third column	4
Step 8 : put the first beam	5
Step 9 : put the second beam	5
Step 10 : add the first column of the second line	6
Step 11 : add the second column of the second line.....	6
Step 12 : add the third column of the second line.....	7
Step 13 : put the third beam.....	7
Step 14 : put the fourth beam	8
Step 15 : add the first column of the third line.....	8
Step 16 : add the second column of the third line.....	9
Step 17 : add the third column of the third line	9
Step 18 : put the fifth beam	10
Step 19 : put the sixth beam	10
Step 20 : put the first floorboard	11
Step 21 : complete the floor of the first line.....	11
Step 22 : add the first floorboard of the second line.....	12
Step 23 : complete the floor of the second line	12
Step 24 : add the first barrier of the roof	13
Step 25 : add the second barrier of the roof	13
Step 26 : add the third barrier of the roof	14
Step 27 : add the fourth barrier of the roof.....	14
Step 28 : add the sixth barrier of the roof	15
Step 29 : add the eighth barrier of the roof.....	15
Step 30 : place the supports of the staircase.....	16
Step 31 : cover the supports of the staircase - 1	16
Step 32 : cover the supports of the staircase - 2	17
Step 33 : place the first step - 1	17
Step 34 : place the first step - 2	18
Step 35 : place the second step	18
Step 36 : place the fourth step - 1	19
Step 37 : place the fourth step - 2	19
Step 38 : place the fifth step	20
Step 39 : place the sixth step	20
Step 40 : final result	21

Step 1 : create the first pavement

Step 2 : add the second pavement

Step 3 : add the third pavement

Step 4 : add the fourth pavement

Step 5 : add the first column

Step 6 : add the second column

Step 7 : add the third column

Step 8 : put the first beam

Step 9 : put the second beam

Step 10 : add the first column of the second line

Step 11 : add the second column of the second line

Step 12 : add the third column of the second line

Step 13 : put the third beam

Step 14 : put the fourth beam

Step 15 : add the first column of the third line

Step 16 : add the second column of the third line

Step 17 : add the third column of the third line

Step 18 : put the fifth beam

Step 19 : put the sixth beam

Step 20 : put the first floorboard

Step 21 : complete the floor of the first line

Step 22 : add the first floorboard of the second line

Step 23 : complete the floor of the second line

Step 24 : add the first barrier of the roof

Step 25 : add the second barrier of the roof

Step 26 : add the third barrier of the roof

Step 27 : add the fourth barrier of the roof

Step 28 : add the sixth barrier of the roof

Step 29 : add the eighth barrier of the roof

Step 30 : place the supports of the staircase

Step 31 : cover the supports of the staircase - 1

Step 32 : cover the supports of the staircase - 2

Step 33 : place the first step - 1

Step 34 : place the first step - 2

Step 35 : place the second step

Step 36 : place the fourth step - 1

Step 37 : place the fourth step - 2

Step 38 : place the fifth step

Step 39 : place the sixth step

Step 40 : final result
